

UE Solidarity!

UE Local 506 and Local 601 Unite

UE members from Grove City and Erie GE plants came together this weekend to compare notes and to discuss plans for upcoming contract negotiations with the highly profitable General Electric Corporation. On Tuesday, UE Local 506 President, Scott Slawson talked with Grove City employees about how all GE employees can improve their wages, benefits and working conditions by organizing and staying united.

This year for the first time, UE Local 601 from Grove City will have a representative present at the bargaining table. Slawson urged Grove City workers to join UE and show their support for the union's goals in the upcoming national contract negotiations. Together, workers in Erie and Grove City have the power to influence what GE does on health insurance, wages and other issues. The 2015 negotiations are too important for all of us. Together we are stronger, together we can negotiate a fair and decent contract.

As part of the solidarity week activities, members from UE Local 506 and UE Local 684 joined us to show their support. They participated in gate leafleting, did home visits, phone banking and attended the Saturday Social. Together we can accomplish our goals and win improvements in contract negotiations.
