**The Trans-Pacific Partnership (TPP) agreement, if ratified, will >>>**

-  Destroy jobs.
-  Increase the power of multinational corporations to overturn rules and laws that protect workers and the public.
-  Undermine environmental and food safety laws.
-  Hurt access to medicines.

The TPP will further profit multinational corporations and undermine our very democracy, while putting public health at risk and destroying the jobs of American workers.

Unfortunately, Pres. Obama has indicated he intends to push the lame-duck Congress to ratify the TPP after the election, and Corporate America is gearing up for a major lobbying effort to try to push this through.

**We cannot let this happen.**

**Will you join us on #N17 to demand that Congress oppose the TPP?**
