Dear Sisters and Brothers of the United Electrical, Radio & Machine Workers of America (UE),

Warm greetings from Palestine.

On behalf of our members, we would like to express our deepest appreciation for the courageous resolution on "Justice and Peace for the Peoples of Palestine and Israel" that you adopted at your 74th National Convention on August 20, 2015, in support of our right as Palestinians to live in peace and dignity as equals on our lands.

In line with its long history of fighting for human rights, justice and equity, UE has once again shown the way to the labor movement in the US and beyond. We commend you for calling on your government to change its one-sided foreign policy that disregards human rights and harms any efforts at reaching a just peace, and for fully endorsing our call for boycott, divestment & sanctions (BDS) launched a decade ago. We sincerely hope that other national unions in the US and many other countries will follow in your footsteps.

Your active solidarity warms our hearts and gives us hope that one day the working class all over will mobilize as one to help us end this brutal colonial occupation, and bring down the blockade, walls and checkpoints. There is much work to be done, but we are confident that with your assistance, we can achieve further progress in our peaceful struggle for the full recognition of our human rights.

We look forward to working with your officers and members towards this goal, and to establishing lasting comradely ties between our unions.

Yours sincerely,

PPSWU President
