**THE TRANS-PACIFIC PARTNERSHIP (TPP)** is a massive trade and investment pact, justly described as "NAFTA on Steroids" by the hundreds of organizations and millions of people who oppose it. TPP would include the United States, Australia, Brunei, Chile, Malaysia, New Zealand, Peru, Singapore, Vietnam, Canada and Mexico.

The TPP was written in secret by and for the corporations, with 600 lobbyists reviewing and commenting on the text. The deal allows corporations to sue governments for lost profit in a corporate-run tribunal that is unaccountable to anyone. The same companies that would sue, also run the tribunal and can demand billions of dollars for policies that don't favor them.

*The TPP will force us to roll back regulations that protect workers, communities and the environment.*

## THE TPP THREATENS TO:

- **ELIMINATE** millions of jobs in the United States;
- **UNDERMINE** financial industry regulations needed to prevent another meltdown;
- **RESTRICT** free use of the internet;
- **DISMANTLE** "Buy Local" and "Buy American" preferences which promote local business;
- **RESTRICT** use of cheaper generic drugs by extending patents for drug companies;
- **CHALLENGE** food safety regulations including on tobacco and GMO labeling;
- **PREVENT** action to stop climate change, including action on fracking;
- **DISALLOW** laws/regulations limiting export of oil, LNG, coal, natural gas and water;
- **ALLOW** foreign corporations to sue governments for lost profit as a result of laws and regulations.
